**See Visual Samples  
on Pages 44 & 45.**

### Important:

Hand-wiped stains reveal the natural beauty, color, and characteristics of wood. Wood grain is enhanced, not hidden. Certain variations in color, tint, and depth are expected from one piece of wood to another.

We offer sample color chips for general color selection. See pages 44 & 45 for examples. While these may help in eliminating some colors, many times they are too small to make project decisions. We can provide a larger sample (8" x 8") to help refine your choice.

We recommend you purchase a finished sample door of your choice for final decision.
